

$T_p = 1400^\circ\text{C}$

20% m7-16 pyroxenite + 80% peridotite

Melt compositions at  $P_{\text{final}} = 5$  kbar, no aging

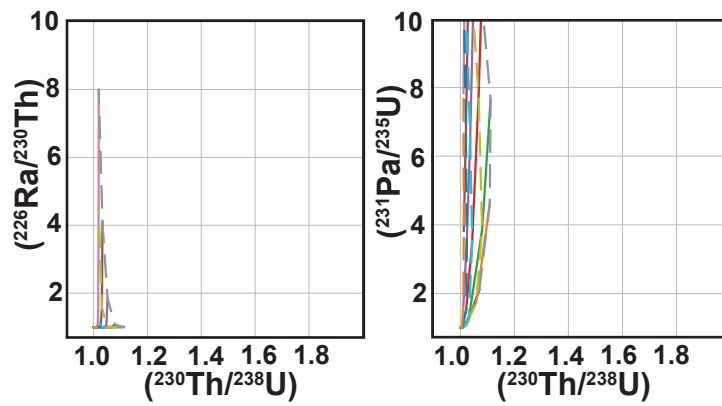

### Equilibrium melting

#### Peridotite

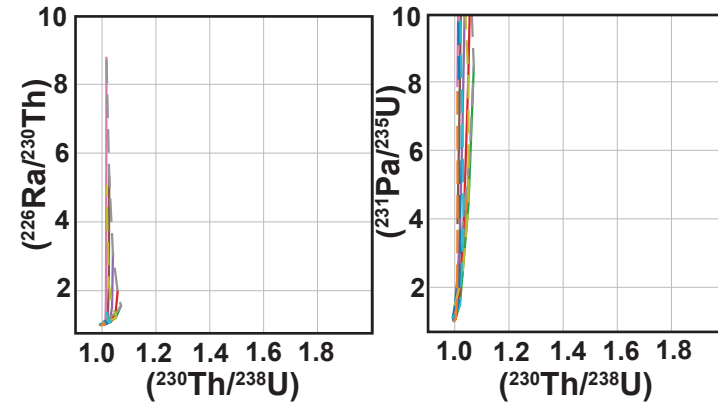

### Pure disequilibrium melting

#### Peridotite

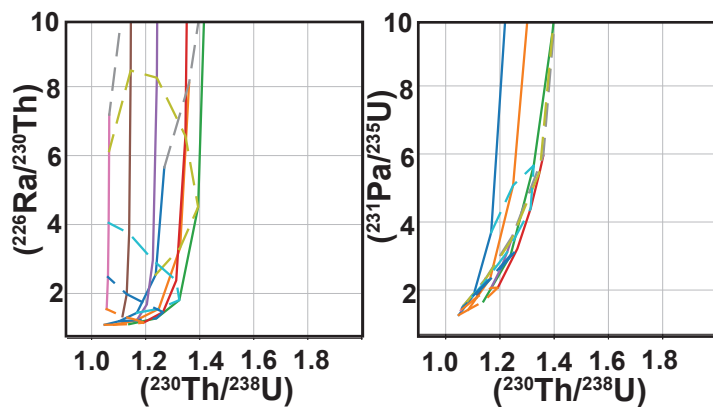

Da = 0.1

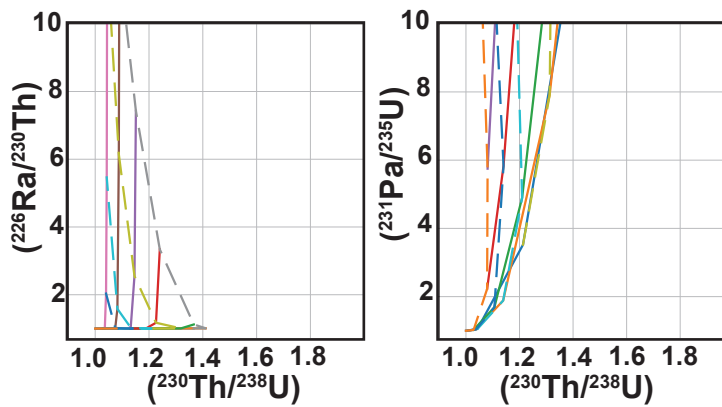

#### Peridotite

#### m7-16 Pyroxenite

#### m7-16 Pyroxenite
